Abstract Air transport faces multiple challenges. Fuel efficiency will be an overriding priority of the future.

I Quarto

Quarto enables you to weave together content and executable code into a finished document. To learn more about Quarto see https://quarto.org.

II Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
1 + 1
```

```
[1] 2
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).

II.1 Moving to new frontiers

Here comes some cool more text and a graphic. The details we are looking for can be found in Figure 1.
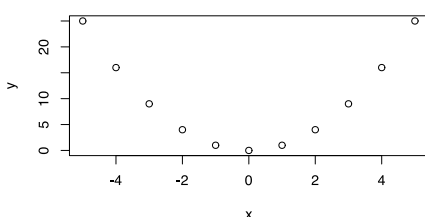

```
x <- -5:5
y <- x^2

plot(x,y)
```

Figure 1: A splendid parable to show something

The formula to rule them all

$$a^2 + b^2 = c^2$$
